

PACHIPULUSU SUBRAMANYA SREENIVASAN

Software Quality Assurance Engineer

+91 7670947432 | sreenivasan81003@gmail.com | [LinkedIn](#) | Bangalore, Karnataka

PROFESSIONAL SUMMARY

Automation & QA Engineer with ~1 year of expertise in Manual and Automation testing, script development, and continuous integration. Proven track record in ensuring software compliance, reducing post-release bugs, and improving the efficiency of deployment pipelines. Adept at collaborating with cross-functional teams to enhance software quality and user experience. Additionally integrated Jira MCP with Claude AI, enabling seamless bug reporting and project management directly via Claude commands.

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer June 2025 – Present

Inito Health Technologies Pvt Ltd (Samplytics Technologies)

- Designed and executed 2000+ manual test cases based on PRD and FRS documents to ensure complete test coverage for Android and iOS mobile applications.
- Identified and reported 350+ defects using JIRA, ensuring effective tracking and resolution through the defect lifecycle.
- Automated 250+ mobile test scenarios using Appium with TestNG for Android and iOS platforms.
- Automated the Community Feed module — a social content platform supporting posts, likes, comments, and polls using Appium with TestNG, covering complex multi-user interaction scenarios.
- Designed reusable automation scripts to simulate multiple user accounts interacting with the feed, validating feed updates, engagement actions, and data consistency across users.
- Implemented end-to-end regression tests for feed activities and executed them on BrowserStack cloud environments, ensuring cross-platform reliability for Android and iOS.
- Reduced manual regression testing effort by 40%, decreasing execution time from 4 days to 1 day by automating repetitive feed interaction workflows.
- Utilized ChatGPT to accelerate test case generation and scenario brainstorming from product requirements, enabling 50% faster test case creation while maintaining comprehensive coverage.
- Implemented Claude AI + JIRA MCP integration to streamline defect creation by parsing failed test cases and generating structured bug reports, improving bug reporting efficiency by 70%.
- Integrated Postman collections into the TestNG framework to inject API validations directly into automation suites, enabling robust end-to-end workflow testing and increasing usability by 45%.
- Developed a script to automatically generate test case IDs based on requirement IDs, improving traceability and test management efficiency.
- Actively worked in an Agile Scrum environment, participating in sprint planning, daily stand-ups, and retrospectives to ensure testing aligned with development and business priorities.

TECHNICAL SKILLS

Automation Frameworks: Appium (Android & iOS), Selenium WebDriver, TestNG, Page Object Model (POM)

API & Integration Testing: Postman, Postman-TestNG Integration, End-to-End Workflow Testing

Cloud & Device Testing: BrowserStack (Real Devices & Emulators), Cross-Platform Mobile Testing

Programming Languages: Java (Primary), Python, JavaScript

CI/CD & DevOps Tools: Git, GitHub, JIRA (Defect Tracking & MCP Integration), Confluence

AI-Augmented QA: Claude AI + JIRA MCP (Automated Bug Reporting), ChatGPT (Test Case Generation), Rovo

Manual & Functional Testing: Manual Testing, Mobile Application Testing (iOS & Android), Firmware/OTA Testing, API Testing

Design & Docs: Figma, Mermaid, Test Plan / Test Strategy Writing

EDUCATION

Bachelor of Engineering – Electronics & Communication (B.E ECE) 2021 – 2025

Jansons Institute of Technology (Autonomous)

Pre-University Course – Mathematics, Physics, Chemistry (PUC MPC) 2019 – 2021

Narayana Junior College

CERTIFICATIONS & TRAININGS

AWS Academy Graduate | Networking Essentials | Full Stack Web Development
